The Dallas Convention Center Hotel Groundbreaking Ceremony

The new Omni Dallas Convention Center is under construction. With amenities for both hotel guests and city-dwellers alike, the DCCH is situated to be one of the most-visited sites in the city.

The Omni Dallas Convention Center Hotel occupies 3/4 of its 8 acre site, while the remaining site area will serve as a counterpart to the hotel and offer amenities to both the hotels guests and local residents through the addition of dining, retail, and various other pedestrian amenities. Additionally, the hotel tower was situated in such a way that will provide shade to both the northern and eastern portions of the site, where surrounding outdoor plazas, dining, and shopping venues are to be located. This was done in an effort to promote an active, pleasant and inviting pedestrian experience along both Lamar and Young street. In order to further activate these newly formed public spaces, the podium level hotel functions have been clad primarily in a highly transparent glazing. The transparent skin fosters a sense of spaciousness; providing the entry plaza with a seamless and unencumbered integration between street and structure, inviting guests in without overpowering or intimidating.
