## 5G Wins 1st place at DesignOvation 2009

5G was Awarded 1st place from the American Society of Interior Designers for Emerging Designer, Commercial for the second year in a row

Serving coastal-quality seafood, sushi, and prime steak in an expertly appointed space, this North Dallas eatery proves that ambiance is an integral part of the fine dining experience. The softly lit interior takes as its inspiration the colors and shapes of life under the ocean waves. In the main dining room, patrons sit beneath a glowing, custom-made coral chandelier. Large parties are ushered upstairs to the “Green” mezzanine where they are privy to a bird’s eye view of the bustling space below. An adjacent art gallery showcases the works of local artists while classic ocean-themed films play on large scrims.
