2007

The Go Fish restaurant and lounge offers a distinctive variety of social experiences. The concept creates both a romantic, elegant and refined dining atmosphere and a highly fashionable and energetic lounge scene.

The dining spaces accommodate a number of different guest types. Individual couples and small groups dine in an intimate setting, partitioned behind banquettes. For those interested solely in the cuisine, a dining room is located adjacent the chef's kitchen. In these private dining areas the restaurant chef makes frequent visits offering a complementary tasting of their most recent creation.

Corporate events and executive dining take on a more exclusive position. These patrons dine in style seated above all others in the mezzanine overlooking the activities below.

Patrons looking for more excitement take center stage. In the lounge and wine bar areas guests are encouraged to mingle, have a few drinks, and work the floor.
